S/L	Bug Title	Steps to Reproduce	Expected Result	Actual Result	Severity	Priority	Test Case Reference
1	During API testing, no product results were returned for the tested search criteria. As a result, most of the API test cases failed.	1. API returned HTTP 200 and success: true, but no product results were returned in the result array. 2. Send the request for each API test case, such as valid keyword search, price range filtering, and product sorting. 3. Observe the result	The API should return HTTP 200 with success: true and the result array should contain the products matching the valid search criteria.	No product results are returned in the response for any of the valid search criteria.	Major	High	TC_API_01 - TC_API_08
2	The pagination feature is missing from the website's search results page.	1. Open the Browser 2. Navigate to the Url: https://demo-shop.gigalogy.com.bd/ 2. Scroll to bottom of the result page 3. Click Next / next page number"	Pagination should be available on the website page to navigate through the results.	Pagination is missing from the website page.	Medium	Medium	TC_MN_07
3	Inconsistent language displayed on the website	1. Navigate to the Website 2. Observe the Functions name 3. Observe the product name & details	All website text should be displayed consistently in the same language at a time.	Some text is displayed in English, while other text is displayed in Japanese.	Medium	Medium
