

Technical Assessment Basic Performance Testing Report

Technical Assessment Report :

Endpoint Tested: POST /v1/items/search

Tool Used: Postman (Performance Testing feature)

Total requests sent : 51

Load Profile: Fixed profile, 1 Virtual User, 1minute duration

Test Date: Sep 23, 2026

Results Table

Metric	Result
Total Requests Sent	51
Avg. Response Time	1,114 ms
90th Percentile (P90) Latency	1,631 ms
95th Percentile (P95) Latency	2,454 ms
Throughput	0.84 requests/second
Error Rate	0
Failure Rate	0

Interpretation

The endpoint completed **51** requests with a **0% error** rate, indicating all requests were successful. The average response time was **1,114 ms**, while the **P95 latency was 2,454 ms**, showing some variation in response time. The **throughput was 0.84 req/s**, which is expected for a single virtual user. Overall, the endpoint performed reliably under this light load.
